

The new tank dishwashers:
Top-class cleaning results combined with short cycles

Spotless glassware.
Perfectly clean crockery.
Sparkling cutlery.

Tough on dirt, gentle on loads

Spotless glassware, perfectly clean crockery and sparkling cutlery – top-flight hospitality is visible at a glance. But the new tank dishwashers from Miele Professional inspire by more than the first-class results they produce. With their short cycles, their sparing use of water and electricity and their gentle wash action, these new products are set to become the top-performing newcomers in hotels, restaurants, bars and cafes.

Strong and adaptable

Tank dishwashers come into their own wherever large amounts of tableware need to be washed in a short space of time. Their insatiable appetite for hard work is now about to be taken to the next level by a new model generation from Miele Professional. Spray arms ensuring full surface coverage and the close monitoring of the condition of the wash liquor guarantees excellent efficiency, even in non-stop use. Load-specific programmes, variable pump pressure and a smooth gentle-start mechanism adapt programmes perfectly to the needs of workaday life in a commercial environment.

Capacities to meet all requirements

The new tank dishwashers offer right-sized capacities for a wide range of applications and baskets for the thorough cleaning of all types of loads. Thanks to their concise and easily visible touch display, these machines are easy to operate without mistakes even under rush-hour conditions.

Miele advantages worth their weight in gold

Perfect dishwashing results in all situations

The new tank dishwashers from Miele Professional feature specific programmes for all load types and degrees of soiling. All the key parameters, e.g. cycle times, temperatures and spray pressure, are carefully tuned before leaving the factory and can be further customised on site - with the result that delicate champagne flutes are cleaned just as gently and reliably as plates with dried-on food residue.

Excellent user convenience

To speed up and simplify everyday operation, the touch display only shows relevant information and symbols during a running programme. And it offers the ultimate in user convenience: The most frequently used programmes can be launched fast and simply, while the colour-change indicator provides up-to-the-minute information on programme progress and machine status.

Wide range of dispensing options

Whatever the situation on site: The new tank dishwashers are geared to the best possible dispensing method. The range with its various models comprises versions with integrated dispenser pumps and siphons for external canisters to models with integrated tanks and dispenser pumps - ideal for kitchens without the space for storing canisters.

Highly economical

The new tank dishwashers from Miele Professional combine high throughput capacity with superb efficiency. Even in the standard programmes, water, electricity and detergent is used extremely sparingly; consumption is reduced to a bare minimum in the Eco cycle. The high-quality design of these machines also means they require less maintenance and last longer, making them the products of choice for discerning clients with a view to their economic credentials.

Strong, reliable, efficient:

Forever Better

Since 1899, Miele - a family-run company - has subscribed to a clear corporate philosophy condensed into the two words 'Forever better'. This overarching claim is the foundation of Miele's proverbial quality and sustainability and the power of innovation of a brand 'Made in Germany'. A brand promise which gives commercial users the certainty of having chosen the right product.

Award-winning

Uncompromising product reliability and service dependability is the reason why customers have repeatedly voted Miele the best and most trustworthy brand. Coveted awards such as the MX Award, the iF and reddot Design Awards and the German Sustainability Prize endorse the outstanding position Miele commands with respect to design, quality management and the conservation of valuable resources.

Proficient

Miele Professional has been developing and manufacturing a broad range of high-quality laundry machines, dishwashers, washer-disinfectors and sterilisers for decades. Carefully selected accessories, comprehensive advisory services and a Miele service department which guarantees a quick response ensures that machines perform to satisfaction and offer the ultimate in performance and efficiency.
